2027 new site, more capacity

German quality. International partnership.

Centax Pharma GmbH is a certified contract manufacturer of food supplements and foods for special medical purposes near Stuttgart. We develop, produce and package for brand owners, distributors and pharmacy brands in Europe and beyond.

We bring our formulation know-how into your project from the very first concept – and develop a recipe tailored to your market, positioning and budget.

One partner
Idea to released product

Fast decisions
Owner-managed, short paths

Export know-how
Documents for regulated markets

IFS Food · PIAQ · A·B·CERT · GMP CERTIFIED

Everything from one source.

Ten services, one partner. Book the complete package – or only the modules you need.

- **Develop**
  Trends, concept, regulatory advice and tailor-made formulas.
- **Produce**
  Certified raw materials, test series, GMP production and quality control.
- **Deliver**
  Packaging to your design and export-ready documentation.

Focus on your sales – we take care of the rest.
Large-volume purchasing of raw materials and packaging benefits your project.

Six steps to your finished product.

One contact person · Transparent timeline · Complete documentation

1 Briefing & Concept

We analyse idea, target market and budget – and check feasibility at short notice.

2 Recipe & Raw Materials

Formulation, selection of raw materials and a transparent, binding quotation.

3 Analytical Development

Specifications and test methods are defined and transferred to the lab.

4 Test Series

Development batches and samples confirm taste, process and stability.

5 Production

GMP manufacturing with in-process controls and complete batch records.

6 Release & Delivery

Laboratory analysis, release with certificate of analysis and shipping-ready goods.

Quality control at every step

Your idea, scientifically developed.

Concepts, formulations and packaging solutions – your requirements and the optimal dosage form are at the centre of our cooperation.

01

Analytical Development

We review your raw-material list or formulation and tell you at short notice whether it can be realised – or improved.

02

Raw Material Selection

Only certified GMP producers and several qualified sources. On request, we store your raw materials on site.

03

Product Development

From ingredient selection, composition and mode of action to development batches – with specifications and documentation.

04

Regulatory & Documentation

Labelling check against EU food law, health claims and maximum levels, and documents for registration in export markets.

From the first idea to the development batch

Seven dosage forms. Blistered & packed.

From mixing powders and granulates in the right ratio to the finished, packed product.

Hard Capsules

HPMC or gelatine – tasteless and easy to swallow.

Softgels

For oils and fat-soluble actives like omega-3 or D3.

Tablets

Round or oblong – compact and cost-efficient.

Powders

Precise blends for drinks, shakes and portion packs.

Sachets

Sealed single portions, e.g. electrolytes or collagen.

Doypacks

Resealable stand-up pouches for multi-portion powders.

Liquids

Drops, syrups and drinking solutions.

+ Blister Packaging

Capsules, softgels and tablets blistered and cartoned.

Hard capsules & tablets.

The classics of food supplements – produced on modern equipment with precise dosing and consistent quality from batch to batch.

Hard Capsules

Tasteless, odourless and easy to swallow – ideal for powders that dissolve quickly in the stomach.

Shell	HPMC (vegan) or gelatine
Sizes	00 and 0 as standard, further sizes on request
Filling	Automatic capsule filling (Syntegon)
Packed in	Cans and jars, blisters, bulk

Tablets

Compact, durable and cost-efficient, with high active content per unit.

Formats	Round and oblong, further formats on request
Process	Direct compression; slugging for poorly flowing blends
Controls	Weight, hardness and disintegration in process
Packed in	Cans and jars, blisters, bulk

GMP production with in-process controls and complete batch documentation – from pilot batch to large series.

Softgel production.

The first choice for oils and fat-soluble actives – taste and odour masked, sensitive ingredients protected from oxygen and light.

Omega-3 · D3 · K2 · E · Q10

Taste & odour masked
No fishy aftertaste – higher acceptance.

Protected actives
Hermetically sealed against oxidation.

Precise dosing
Exact amounts of liquid actives per capsule.

Premium appearance
Glossy, easy to swallow, many colours.

SPECIFICATIONS

Shell	Bovine or fish gelatine; plant-based on request
Shapes	Oval, oblong and round; transparent or coloured
Fill types	Oils, oily solutions and suspensions
Packed in	Cans and jars, blisters, folding boxes, bulk

PROCESS

1. **Fill preparation**
2. **Encap-sulation**
3. **Drying**
4. **Inspection**
5. **Packaging**

Sachet production.

The perfect format for powders and granulates: hygienic, pre-dosed and ready to take – directly or dissolved in water. Each portion is protected by a printable aluminium or laminated foil.

Typical contents

Electrolytes · Collagen · Vitamin drinks · Protein · Fibre

Why sachets

No measuring – ideal for travel, sampling and subscription boxes.

Filling	Powders and granulates, precisely dosed per portion
Foils	Aluminium or laminated foils, printed or neutral
Coding	Batch number and best-before date on every portion
Secondary pack	Folding boxes, e.g. 10, 20 or 30 portions; displays

Doypack filling.

Stand-up pouches are the format of choice for multi-portion powders: resealable, light and with a large branding surface – strong on the shelf and in e-commerce.

SPECIFICATIONS

Fill goods	Powders and granulates
Fill weights	e.g. 200 g to 500 g, other sizes on request
Pouches	Stand-up pouches with zipper, printed or labelled – sourced by us or supplied by you
Extras	Scoop insertion, batch and best-before coding, shipping cartons

TYPICAL APPLICATIONS

Collagen · **Protein** · **Greens & superfoods** · **Electrolytes** · **Sports nutrition**

Blister packaging & cartoning.

The ideal hygienic and user-friendly packaging for capsules, softgels and tablets – every unit protected until it is taken, with precise print-mark control for a consistent look.

Products
Hard capsules, softgels and tablets

Blister types
All-aluminium or push-through with mono, duplex or triplex films

Options
Child-resistant films on request; batch and best-before coding

Cartoning
Printed folding boxes with package insert

PROCESS

1. Forming
2. Filling
3. Sealing
4. Coding
5. Cutting
6. Cartoning

Accurate, reliable, efficient.

We pack and assemble food supplements as well as food, hygiene and other non-pharma products. Packaging materials can be supplied by you or procured by us.

OUR PACKING SERVICE HELPS WITH

01 **Bundle packs and special promotions**

02 **Packaging changes and promo packs**

03 **New product launches**

04 **Missing or failed machine capacity**

05 **Small runs with long set-up times**

06 **Sorting and checking of defective goods**

Bottle & container filling
Tablets, capsules, coated tablets, liquids, globules and special products.
